

Are you the parent of a healthy adolescent?

Partners Human Research Committee

APPROVAL Effective Date

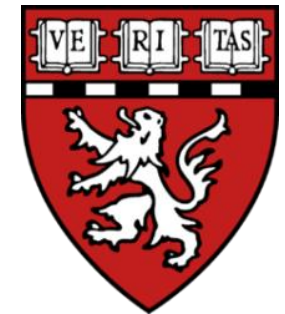

7/19/2017

If you have a female child between the ages of 14 – 17, she may qualify to participate in this research study. Your child can earn up to \$100.

This research study is conducted at McLean Hospital in Belmont, MA. Teens will answer questions about their thoughts and feelings. Teens will also undergo an fMRI brain scan. Parent permission is required. We are hoping to better understand depression and what factors may put some adolescents more at risk for developing depressive symptoms.
